

LIST OF PUBLICATIONS (1988 - 1998)

Gregory Fogel

1. L. Kantorovich, G. Fogel and V. Gotlib, A theoretical description of complex thermoluminescence curves, 6th Soviet conference on radiation physics and chemistry of ion crystals, Riga SU, October 9th-11th, 1986, p. 462.
2. L. Kantorovich, G. Fogel and V. Gotlib, Thermoluminescence kinetic, 6th Soviet conference on luminescence receivers and radiation transformers, Lvov SU, August 26th-28th, 1988, Abstracts, 1988, p. 71.
3. L. Kantorovich, G. Fogel and V. Gotlib, A theoretical description of complex thermoluminescence curves: I, J. Phys. D: Appl. Phys. 21, pp. 1008-1014, (1988).
4. G. Fogel and L. Kantorovich, Peak area calculation in complex thermoluminescence curves, 6th Soviet conference on luminescence receivers and radiation transformers, Lvov SU, August 26th-28th, 1988, Abstracts, p. 96.
5. G. Fogel and L. Kantorovich, A theoretical description of complex thermoluminescence curves: II, J. Phys. D: Appl. Phys. 22, pp. 817-824, (1989).
6. G. Fogel, L. Kantorovich and V. Gotlib, Thermoluminescence kinetic, 7th 6th Soviet conference on radiation physics and chemistry of inorganic materials, Riga SU, October 11th-13th, 1989, Abstracts, p. 546.
7. G. Fogel, Area calculation of the thermoluminescence curves, 7th 6th Soviet conference on radiation physics and chemistry of inorganic materials, Riga SU, October 11th-13th, 1989, Abstracts, p. 548.
8. L. Kantorovich, G. Fogel and V. Gotlib, An integral equation method for discrete and continuous distribution of centers in thermoluminescence kinetics, J. Phys. D: Appl. Phys. 23, pp. 1219-1226, (1990).
9. R. Chen and G. Fogel, Superlinearity in thermoluminescence revisited, Radiation Protection Dosimetry, v. 47, No.1/4, pp. 23-26, (1993).
10. G. Fogel, L. Kantorovich and A. Livshitz, Thermoluminescence kinetic in the case of continuous distribution of trap centers over their activation energies, Journal of Physics: Condensed matters, v. 5, No. 40, p. 7503, (1993).
11. R. Chen, G. Fogel and Kristianpoller, Theoretical account of the sensitization and De-sensitization in Quartz, Radiation Measurement, Int. J. Radiat. Appl. Instrum., Part D, (1994).
12. United States Patent, No. 5,656,814, Aug. 13, 1997, Versatile method and device for thermoluminescence comparative analysis, A. Lurie, G. Fogel and B. Volfson.
13. G. Fogel, B. Frolov and B. Volfson, Surface thermoluminescence method proves to be effective in oil and gas prospecting, World Expro, March (1998).
